TO DEVELOP JUDGMENT SKILLS:

1. Clearly ID the item requiring your judgment.
2. Write down sources to gather info from. This could be a person, group, website, manual.
3. Write down at least 3 pros and cons. If you take action, write what happens if you delay or avoid the issue.

“JUDGMENT COMES FROM EXPERIENCE, AND EXPERIENCE COMES FROM BAD JUDGMENT.” – SIMON BOLIVAR

JUDGMENT RESOURCES

- Read <https://srinathramakrishnan.files.wordpress.com/2016/10/brief-summary-of-turn-the-ship-around.pdf>
- Watch https://www.ted.com/talks/dan_ariely_asks_are_we_in_control_of_our_own_decisions
 - Write down some of the recent decisions you've made lately. Write down any "third, less appealing" (the ugly Tom or Jerry) factors, that may have influenced your decision.
 - Develop a plan for identifying those "distractor" options and understanding how they can influence your judgment at work. For example, if you follow the standard practice of developing three courses of action, identify if all are feasible and beneficial, or if one is an "Ugly Tom".
- Reconnaissance and Wargaming
- COA Development
- Technical Decision Games
